GUIDE TO MAPS

This appendix includes service overview maps, agency maps and SOI options maps.

OVERVIEW

Service overview maps provide key facilities and local agency boundaries mapped for water, wastewater and flood control providers.

Agency maps *generally* depict the boundaries and spheres of influence (SOIs) for local agencies providing or contracting for utility services. These maps have been approved by the local agency. Maps for agencies with adopted SOI's have been verified by LAFCo.

Overview and detail maps depicting sphere of influence (SOI) options follow. Each SOI option is numbered to correspond with options as outlined Chapter 9 of the report. These maps are provided for illustrative purposes only, and should not be construed as providing parcel-level accuracy or as reflective of LAFCo decisions.

This report and the policy options herein are subject to revision as directed by the Commission.

Not all SOI options have been mapped. For limited purpose agencies, those with only one or no SOI option are not mapped. In the case of limited purpose agencies for which the only option is to retain the existing SOI, the reader should refer to the agency maps. Among multipurpose agencies for which the only SOI option is to retain the existing SOI (e.g., City of Piedmont), no SOI options are mapped. The reader should refer to the agency map. For Livermore and Pleasanton, the Urban Growth Boundary (UGB) SOI option has not been shaded; however, each city's general plan map of the UGB, city limits, and SOI has been included. The City of Livermore SOI option relating to a single split parcel in the Springtown area has not been mapped in detail.

CREDITS

The service overview maps and agency maps were prepared by Enabell Diaz of P&D Consultants and Michelle Brusuelas of b.d. systems with map research provided by Cecelia Griego of Burr Consulting.

The SOI options maps were prepared by Cecelia Griego and Barbara Graichen of Graichen Consulting. Most of the SOI options have been drawn or digitized on agency maps that were prepared by b.d. systems. Certain SOI options have been drawn or digitized based on maps from the LAFCo archives, the Alameda County Assessor, Thomas Brothers, or local agency general plans.
